VietNam

PROFILE SUMMARY

I'm a **Software Developer** passionate about building meaningful, user-centric digital products. With over three years of experience in full-stack web development, I focus on creating modern, scalable, and maintainable applications. I enjoy solving complex problems, writing clean code, and delivering elegant, high-performing solutions that balance technical precision and usability.

SKILLS

- Frontend: Nuxt, Next.js, TypeScript, Tailwind CSS.
- Backend: NestJS, Laravel, Prisma, PostgreSQL, Redis
- Tools & DevOps: Docker, AWS, GitHub, Vercel

EDUCATION

Nha Trang University - Bachelor of Information Technology

2018 - 2021

Developed a strong foundation in software engineering, algorithms, and modern web development. Actively participated in coding projects and academic research related to full-stack development.

WORK EXPERIENCE

Screen1 Technologies - Full-Stack Developer

Contributing to the development of a user behavior analytics and tracking platform — similar to Google Analytics — that enables marketers to collect, process, and visualize user interaction data with fully customizable reports.

- Implemented scalable backend services using **Node.js**, **Express**, and **AWS Lambda**, handling millions of tracking events daily.
- Built **real-time event pipelines** leveraging **RabbitMQ**, **Redis**, and **Pusher** to deliver instant analytics updates across dashboards.
- Integrated **Google BigQuery** for data warehousing and advanced behavioral analytics, optimizing large-scale query performance.

Widosoft - Full-Stack Developer

Contributing to the development of a user behavior analytics and tracking platform — similar to Google Analytics — that enables marketers to collect, process, and visualize user interaction data with fully customizable reports.

- Developed **Honrada**, an interactive **English learning web application** featuring vocabulary training, quizzes, and progress tracking, optimized for educational use.
- Built a **Billiards Club Management System**, enabling users to manage bookings, player rankings, and event statistics with an intuitive dashboard.
- Participated in internal **Japanese-oriented web projects**, focusing on localization, performance, and UX adaptation for East Asian audiences.
